Quality Manager – Food & Beverage Manufacturing Description

Our client, an established, family-owned food and beverage manufacturer is seeking a Quality Manager to join their team. This is a hands-on role within a smaller manufacturing operation, focused on maintaining established food safety and quality programs, supporting daily production activities, and ensuring products meet company and regulatory standards. The facility operates two production lines with a small quality team, offering the opportunity to work closely with operations and other departments in a collaborative environment. The ideal candidate will have a bachelor's degree, at least 4 years of quality experience in food, beverage, or ingredient manufacturing, and experience working with GFSI-recognized food safety systems. This is a great opportunity for someone who enjoys a hands-on role in a smaller manufacturing environment and wants to contribute to an established quality program without the complexity and red tape of a large-scale operation.

Quality Manager – Food & Beverage Manufacturing Responsibilities

- Maintain established food safety and quality programs, procedures, and documentation
- Support ongoing GFSI compliance and audit preparation
- Maintain HACCP plans, quality records, and related documentation
- Assist with corrective actions, quality investigations, and continuous improvement initiatives
- Monitor product quality and support day-to-day production activities
- Coordinate with outside laboratories and quality resources as needed
- Support employee training on food safety, GMPs, and quality procedures
- Collaborate with internal departments to maintain quality and food safety standards

Quality Manager – Food & Beverage Manufacturing Qualifications

- Bachelor's degree required
- 4+ years of quality experience in food, beverage, or ingredient manufacturing required
- Experience working with and maintaining a food safety and quality system required
- Experience participating in food safety or quality audits required

- Working knowledge of HACCP, CAPA, and FDA/FSMA requirements required
- Proficiency with Microsoft Office required
